

COMPOSITE SKUs

Composite SKUs are a way to produce a bundle of products under 1 SKU.

Before you start you need to make sure that you have a MASTER SKU set up and you also have the COMPONENT SKUs set up on the products page. The MASTER SKU will be the bundle that features on your selling platform. The COMPONENT SKUs will be the SKUs that are to make up the bundle.

1. Login to your my.vdepot account
2. Go to 'PRODUCTS' tab
3. Click on the SKU that will be the MASTER SKU
4. On the righthand side of the page there is a little COMPOSITE box – tick this

Product page will change and from this you can now add in the components that make up the bundle.

5. Use the PRODUCT SEARCH bar – type in the SKU that needs to be added to the bundle
6. Click on the product
7. Enter the quantity required in the box and push ADD

Repeat steps 5-7 until all the required SKUs are listed

8. Push SAVE once complete

Screenshot are below to show the process above
